Points to note

- Do not confuse the markers on the enclosed map with any way marker symbols you may see placed along the actual walk. The numbered markers shown on the map are to give approximate location on the route with the numbered written instructions.
- Some sections of the walk may be muddy after heavy rain. There are a couple of narrow stone stiles to negotiate with varied terrain.
- Part of the walk follows the river Aire that can be swollen and areas flooded following heavy and prolonged rainfall. Always take care when walking by rivers and canals.
